

How the Pepco Energy Wise Rewards™ Program Works

Web-Programmable Thermostat

1. Sign up

It's easy to sign up for Energy Wise Rewards. Simply return the postage-paid reply card, visit our website, or call us to speak to an Energy Wise Rewards customer representative today.

2. Energy Wise Rewards thermostat installed

After you schedule your appointment, we will install a new web-programmable thermostat in place of your existing thermostat. Installation generally takes a little over an hour.

3. Wireless signal sent

When demand for electricity peaks, we will send a wireless signal that “cycles” the compressors of participants’ units. Typically these conservation periods amount to less than 1% of the year.

4. Balance the demand for electricity

As participating units are cycling, the demand for energy lessens. As a result, less electricity needs to be generated.

Web-Programmable Thermostat

5. Maintain your routine

Depending on your participation level, you may or may not notice the change in temperature.

6. Conservation mode ends

Once the conservation period has ended, and the demand for electricity has lessened, your equipment returns to standard operation.
